

AcousticDensity

December 3, 2019

AcousticDensity	<i>Calculate number density from NASC in length intervals</i>
-----------------	---

Description

This function takes NASC and

Usage

```
AcousticDensity(NASCDATA, m = 20, a = -70, d = 1)
```

Arguments

parameterName	Parameter description.
---------------	------------------------

Details

This function is awesome and does excellent stuff.

Value

A data.table is returned with awesome stuff.

See Also

[roxygenize](#) is used to generate the documentation.

Examples

```
x <- 1
```
